About Me

I am a software engineer specializing in full-stack and back-end development, with hands-on experience building web applications using JavaScript, TypeScript, React.js, Next.js, Node.js, Python, and Django. I have a strong track record across freelance and professional roles, including AI-driven back-end development at Vitafluence.ai, where I work with LangChain and ethical AI frameworks. I am committed to delivering high-quality, scalable software solutions and continuously advancing my skills in modern web technologies and AI integration.

Professional Experience

Vitafluence.ai

Back-end Developer - Full-time (hybrid)

Frankfurt, Germany

October 2023 - Present

- Designing and developing AI-powered full-stack applications using Python (Django), LangChain, REST APIs, and modern React-based front-end frameworks.
- Conducting ongoing research and data analysis to create responsible AI applications; collaborating with cross-functional teams across time zones in an agile remote environment.

Upwork

Full Stack Developer - Freelancer

Istanbul, Turkey

October 2021 - July 2023

- Developed full-stack web applications for international clients using React.js, Next.js, Node.js, Express.js, MongoDB, and MySQL. Built projects including a full-featured tour booking platform (Node.js/Express/MongoDB), a PHP e-commerce system, a React color palette generator, and a weather application with live API integration.

Internships

Extramus

Full Stack Developer - Intern

Cosenza, Italy

July 2023 - October 2023

- Utilize HTML, CSS, Tailwind, JavaScript, and ReactJS to craft application interfaces, integrating data

seamlessly from backend services and databases such as PHP (Laravel), MySQL, and NextJS.

Prodexo

Tunis, Tunisia

Back-end Developer - Intern

July 2022 - September 2022

- I worked for Prodexo, a company that provides services in web development, server management, and content management. I was responsible for developing the back end for the Opomise application, a French start-up that helps people to sponsor their businesses efficiently and more easily.

The main tasks that I was responsible for were:

- Developing application Back-end using Laravel 9.
- Working with Facebook APIs and Facebook SDK for PHP.
- Designing and developing Databases using MySQL with Eloquent.
- Providing the user with the ability to create Ads and sponsor his or her business pages.

BROAD TECHNOLOGY

Algiers, Algeria

Networking Assistant - Intern

July 2021 - September 2021

- I spent a month at Broad Technology for my school's summer internship, overseeing the end-to-end process of computer network setup, from client acquisition and planning to architectural design, installation, and configuration.

Education

USKUDAR UNIVERSITY

Istanbul, Turkey

BACHELOR OF COMPUTER ENGINEERING

September 2019 - June 2023

UNIVERSITY OF ALGIERS 3

Algiers, Algeria

BACHELOR OF FINANCE AND ACCOUNTING

September 2016 - July 2019
